

for buy: we keep like price coming from upper to lower
and reaction in lower level like sweep and after x pips of body
close we keep sl below sweep and enter long

for sell vice versa price goes from down to up reacts with
a level and we can enter sell with same features like buy

targets we can try like 1.2 or 1.3 and trail

body close above the level eg 2 pips acts as a conformation

sweep

sl placement we will keep in the sweep region like this
